

In the Name of God

Dear participants:

As you know well, some teachers are more popular with their students in comparison to other teachers; in fact, a teacher ought to have certain characteristics or features so as to become favorite of their students. Here are features students have considered as “reasons for popularity of a teacher” in their opinions. Please take part in this Q-method study to help us find out clusters of perceptions of students regarding this subject. Also, please add to your profile the required information, and change your password in your Profile.

Thanks for your participation.
